

You are an experienced researcher specialized in designing, executing, and analyzing behavioral experiments? You are interested in applying your skills in commissioned research and help stress-testing public policies?

Then you might be the right candidate to join our team as

**RESEARCHER (M/F/D, MAX. 50%, TV-L 13)
REMOTE POSITION**

for an initial fixed term of 12 months.

YOUR ROLE

As Researcher you will work very closely with Behavia's directors on selected projects focusing on consumer behavior in the European Union. Your specific responsibilities and tasks will include:

- Develop experimental designs
- Analyze experimental data
- Draft research reports and papers
- Conduct literature reviews
- Support technical proposals/tenders
- Prepare client presentations and meetings
- General project management and monitoring

You will work fully remotely. Occasional travelling might be required, for example, to attend kick-off meetings, interim or final presentations.

YOUR PROFILE

We are looking for a researcher with the ability to implement projects located at the crossroads between science and policy making and a passion for experimentation. Suitable candidates should:

- Hold a PhD or Master's degree in Experimental Economics, Behavioral Science, Psychology, or related fields
- Have good command of experimental software
- Have good command of statistical software to analyze experiments
- Be able to explain complex experiments
- Be able to work remotely in an international team
- Be fluent in English
- Ideally, have German residence

The position is part-time (max. 50%), and the salary is based on TV-L 13. Depending on your preference, it can also be organized within a freelance agreement.

We look forward to receiving your application till May 15th, 2022, including a short letter of motivation and your CV. Please also state your earliest starting date.
