

You are an enthusiastic researcher specialized in designing, executing, and analyzing behavioral experiments? You are interested to explore captivating cultural and societal topics while contributing your expertise to our consultancy projects? Then you might be the right candidate to join our team as

**(JUNIOR) BEHAVIORAL SCIENTIST (50%-100% FTE)
FREELANCE BASIS**

for a term of 12-18 months based in Riyadh, Saudi Arabia.

WHO WE ARE

Behavia is a leading behavioral science consultancy. Operating in Europe and Saudi Arabia, we apply behavioral insights to help solve pressing societal and organizational challenges. In close cooperation with our clients, we conduct field, online, and survey experiments to learn which solutions work best under controlled conditions. Our growing and motivated team is passionate about translating insights from research into practice and thereby making a meaningful impact.

YOUR ROLE & RESPONSIBILITIES

As Behavioral Scientist you will work on selected projects for public sector clients in Saudi Arabia. Your specific responsibilities and tasks will include:

- Developing experimental designs
- Preparing, coordinating, and monitoring behavioral experiments
- Analyzing experimental data
- Drafting research reports and papers
- Conducting literature reviews
- Preparing client presentations and meetings
- General project management and monitoring

You will work partly at the clients' premises in Riyadh, partly in the field, and partly remotely. Occasional travelling within the Kingdom of Saudi Arabia might be required.

YOUR PROFILE

We are looking for a Behavioral Scientist on a freelance basis with the ability to implement projects located at the crossroads between science and policy and a passion for experimentation.

Suitable candidates should:

- Hold a Bachelor or Master's degree in Behavioral Economics, Experimental Economics, Behavioral Science, Psychology, or related fields
- Be able to explain complex experiments to non-academic audiences
- Have experience in programming experiments and/or surveys
- Have good command of statistical software to analyze the resulting data
- Have strong proficiency in PowerPoint
- Be able to work remotely in an international team
- Be a native Arabic speaker
- Be fluent in English
- Live in Riyadh (Saudi national or resident)

The position can be part-time (50%-100%) and will be organized within a freelance agreement with Behavia Germany.

We look forward to receiving your application including a short letter of motivation and your CV. Please also state your earliest starting date and your salary expectations. The position is open until filled.
